How to get online
Connect to the internet, and open up a web browser. Browse to any page and you will be redirected to the registration page.

Guest access
If you have guests over and they get redirected to the Registration page, they should choose the "I am a guest" option. They will gain 24 hours of online access.

Registering an account
On the Registration page, choose the option "I am a resident" and fill out the appropriate information. Once finished, your account will be created and the device you are using will be added to it, allowing you to browse freely.

Adding a device
Whenever you connect to the network with a new device, choose the option "I have an account". Sign in with your username and password, and the new device will be added to your account.

Retrieving your password
Visit https://communitywifi-ep.cox.com and click "Access my Account." Click "I forgot my password" and choose whether to retrieve your password via text message.
